Before using this product at home, consult with a licensed electrician to ensure your home electrical system can support the use. ³Figures based on WLTP (Worldwide Harmonised Light-Duty Vehicles Test Procedure) static laboratory comined average city and highway cycle test, which measure, energy consumption, range and emissions in passenger vehicles, designed to provide figures closer to real-world driving behaviour. Real life driving results will vary depending on a combination of driving style, type of journey, vehicle configuration, battery age and condition, use of vehicle features (such as heating and air conditioning), as well as operating, environmental and climate conditions. ⁴Subject to State regulations and towbar design. ⁵Metallic paint at additional costs.
